Promotion of climate change response by companies through international initiatives

13 | Response toward the goals of global companies and in their supply chain

- › Global companies promote climate-change countermeasures for themselves and their entire supply chain by (1) ascertaining the current situation, (2) setting medium- and long-term goals, (3) implementing them in small units, and (4) requesting suppliers for cooperation.
- › The content and speed of efforts differ depending on the company and industry, but SMEs with which they have a business relationship will eventually be required to respond. Regardless of
