

B. YOKOHAMA TRANSPORTATION

I. OVERVIEW

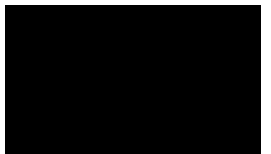

Yokohama enjoys much of the same high-quality urban planning that nearby Tokyo does. The city is a 30 minute trip from the international Haneda Airport and a 40 minute trip from Tokyo Station by the JR line.

Yokohama is also connected to its surrounding wards by several major expressways,

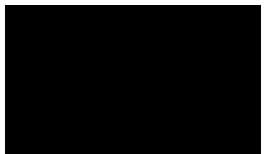

Yokohama Expressway (Yokohama Expressway) and the Yokohama Expressway (Yokohama Expressway) are the main roads connecting Yokohama to the surrounding areas.

US-JAPAN TECHNOLOGY VILLAGE PARTNERSHIP¹

The US-Japan Technology Village Partnership (TVP) project was started to provide common space for US companies seeking to establish a space in Yokohama at a reduced cost.

TVP tenant members enjoy various functions, including: office space, research and development, testing and storage, and processing and assembly. The added benefit of TVP is that all functions are available in a single building, further reducing travel and set up costs.
